

## MASTERS DIVING DATA DOCUMENT

The enclosed document is an alphabetical compilation of those divers, male and female, who have participated in a masters diving national or international meet(s) from the inception of the program. Included in the listing is the first meet the diver participated in, the initial age group, and the page in the Historical Results where the name can be found for the first time. Also, the number of years that diver participated in respective meets, which can then be cross-referenced to the particular year/event.

This document was originally compiled as of August 1994. It will be completely updated every three years, with a supplement issued each intervening year to include new divers coming into the program.
